

UNLIMITED CAPACITY AND FLEXIBILITY

Nationwide SIP provider

Replace your expensive dial tone. Since PRI and T1 trunks are no longer needed, we can save you 40 to 70% on your monthly bill.

SIP Trunking delivers dynamically integrated, high-capacity access to an advanced SIP network provided by a Norstar-managed gateway with a 99.999% uptime SLA.

Norstar offers a powerful and cost-effective SIP solution for every business, whether you have a brand new IP PBX or a traditional phone network you can connect to the cloud for network efficiency and cost optimization. Don't get caught in the past, businesses are rushing to SIP for the flexibility, system integration, and the savings that it can bring to companies of all sizes.

With Norstar SIP Trunking, you can save on long distance, improve ROI on existing IP PBX equipment, avoid exorbitant phone company charges, and scale up or down more efficiently. Our SIP trunking options are designed to save you money. Whether you're operating a small to mid-size business or one with many branch offices, we have the SIP trunking solutions tailored to your geographical needs and usage patterns. Your calls are all routed over our network with end-to-end class of service to guarantee unmatched call clarity.

SIP Trunking provides instant communications expense savings and lets you add capacity according to your business needs. Reduce costs, save money and simplify IT management by combining voice and Internet access over a single Internet connection using your existing IP PBX system. Purchase only the SIP trunks you need based on the maximum number of concurrent calls your business requires. Norstar Sip Trunking provides a physical connection from your PBX to our VoIP network. It allows you to manage costs by leveraging your existing PBX system, maintain business continuity when disaster strikes, and maximizes your phone capabilities over our private IP network.

SIP Trunking allows businesses to enjoy significant cost savings for all their local and long-distance calling and also allows to right-size their communications by buying call paths in desired increments and increasing as their usage grows. You are allowed the use of multiple concurrent call paths to accommodate bursts of traffic due to seasonal calling changes, marketing campaigns and other peak calling needs. Configure your service allowing for on-demand trunks if you have a sudden need for extra lines. SIP Trunks are valuable for businesses with seasonal voice capacity requirements where more lines need to be quickly and easily implemented. SIP

Services boost your voice network capacity and enables you to enjoy the productivity benefits of VoIP technology by using the IP-PBX investments you've already made. Norstar has a georedundant voice network that protects clients from single points of failure.

SIP Trunks are significantly less expensive than traditional analog lines and PRIs. Norstar offers SIP Trunking for single-site businesses and Enterprise Trunking for multi-location businesses. Norstar solutions are fully validated with leading IP PBX vendors, including Cisco, ADTRAN, Digium and many more.

With Norstar, you can order SIP Trunking as a stand-alone solution (bring your own broadband), or as a fully-integrated Voice and Data solution. SIP Trunking services from Norstar provide dial tone to your existing phone system. Available as a native SIP (Session Initiation Protocol) or PRI interface with a Norstar managed voice gateway. Norstar's SIP trunking services include local dial tone, long distance, DIDs and toll-free services. Norstar SIP trunking is designed to save you money.

SIP trunks can dynamically be purchased one at a time. This allows businesses to scale as demand dictates. The dramatic cost savings coupled with voice quality and reliability that equals or even surpasses traditional phone providers makes SIP trunks the logical choice.

- **Scalability on Demand**

Add additional voice channels to handle the increase in call volume as your business grows and you start receiving and making more calls.

- **Multi-Site Shared Trunks**

Shared SIP Trunking services allow customers to connect multiple office locations to the same account.

- **Experts at porting and provisioning**

Our porting and provisioning team are the best in the business.

Norstar's SIP Trunking provides instant communications expense savings and lets you add capacity according to your business needs.

Cut costs and simplify IT management. Integrate voice, video & data onto a single network.

SIP Trunking Benefits:

- **T1/PRI replacement**- Significant savings, Save up to 50% over traditional phone service
- **SIP Trunking** reduces costs by eliminating dedicated circuits
- **Compatible** with most existing PBX systems
- **Bring your own data connection**, no need to switch providers
- **Increase routing** speed
- **Enhanced network** privacy

- **Built-in Disaster Recovery & Multi-layer redundancy** – You'll never miss a call with SIP Trunking's failover system. If your trunk is damaged, your call can automatically be re-directed to your cell phone or alternate landline.
- **Infinite Scalability** – Don't be constrained to the limits of analog lines or PRIs. The only constraint on SIP trunking is the amount of internet bandwidth upon which to provision SIP trunks onto. Purchase the number of concurrent call session increments needed. Scale up as you grow.
- **Call Bursting** -- The ability to utilize additional call sessions above your purchased amount for peak call times.
- **Number Porting** – It is easy to get DIDs anywhere in the country. If you want to keep your numbers we can port them too.
- **Fast Deployment & Rapid Porting**– Norstar can rapidly turn up your service and you can quickly and easily add/remove phone lines, connect new/multiple locations, and increase calling capacity, simply contact us through our 800 number or our website.
- **Web-Based Provisioning** – This web based portal allows you to increase SIP trunks on an as needed basis. Get access to CDR reporting.
- **Streamlined Operations** - Eliminates patchwork voice services from disparate vendors and reduces vendor management complexities.
- **Layered On Features** – Integrate voice, email, fax, and advanced call routing features on top of SIP trunking to give your employees a seamless communications experience.
- **100% Quality of Service (QoS)** guarantee with a dedicated connection
- **Fully Geo-Redundant Network**- Connect to multiple points of presence via public Internet, MPLS, VPN or TDM. Your calls can roll over to multiple secure locations across the country in case of an outage.
- **Best-In-Class Network** Uptime 99.99%.
- **Flat Monthly Rate** – Rates start from \$9⁹⁵/Mo.
- **Amazing Service**- with Norstar, we go above and beyond to meet your communication and customer service needs.
- **Fault-Tolerant Disaster Recovery**
- **HD Voice Quality**- When you add HD phones to your SIP trunking phone service, you upgrade to HD quality
- **SIP enables communications** across the Internet as easy as the corporate LAN, so a multi-location business can use one centrally located IP PBX instead of installing separate ones at each site.
- **Automated Porting** - Norstar routes porting requests automatically with unprecedented visibility.
- **TLS & SRTP Encryption**- Norstar uses TLS & SRTP encryption to protect your communication.
- **Local Numbers Available** in over 50 Countries

- **Very Low long distance rates** (Domestic & International) Norstar offers some of the most competitive rates in the industry.
- **Increased Security**- Several types of authentication provided
- **E911 Support**

Save up to 50% by replacing your expensive dial tone.

Local SIP Trunking

1. Replace your expensive old local telephone service with a new, high quality, easily set up and maintained local VoIP service. It's more cost effective and available everywhere – even in areas where few services are currently available.
2. Free local calling included.*
3. Full features: Including 911 and 411 directory assistance.
4. Get as many phone numbers as you need for as little as 50 cents each.

Long Distance SIP Trunking

1. No monthly recurring charge per channel or simultaneous call path for long distance or toll-free service.
2. Robust support for call center traffic and high CPS (Calls Per Second) calling patterns.
3. Supports G711, G729 Codecs.
4. Fast turn-up (Most orders provisioned) within 72 hours.

Nationwide Managed Private IP Backbone

You can keep your existing broadband service or we can provide you with our managed private IP backbone;

1. Eliminates Latency problems.
2. Increase your data security – Your traffic will never hit the public internet!
3. Service Level Agreement (SLA)
4. FREE managed router.

Local T-1/PRI

Get the Voice over IP cost savings and ease of use delivered right to your traditional phone system with free local calling included or use a digital PRI where voice and data are dynamically allocated in real time for your business traffic needs. Both can be used with your existing traditional phone system. (Includes free managed router).

Nationwide and International DIDs

1. Order out of rate center incoming and outgoing DIDs almost anywhere in the U.S. and dozens of key international locations.
2. Obtain phone numbers from almost anywhere in the world that ring to you locally wherever you are.

DID Features:

With Norstar SIP Trunking you'll gain advanced features like call forwarding, do not disturb, simultaneous ring, and much more. Pick-and-choose features for the numbers you designate or add the complete set to all of your numbers.
